

Find top-notch technical communications talent

When you're looking for the best technical communications professionals for your next project, turn to the expert recruiters at Steyer Associates. Our clients tell us we're their first choice for technical communications staffing thanks to:

- The exceptional quality of our talent
- The deep knowledge and experience of our recruiters
- The high level of customer service that we provide

These factors help us earn almost 90 percent of our business from repeat clients and referrals.

Unlike most other staffing agencies, we focus on technical communications and have more than 12 years of experience helping clients meet their project goals.

Why Steyer?

1. Focus

Unlike other staffing agencies, we have a laser-like focus on delivering technical communications professionals. Our recruiters have extensive knowledge of the technical writing and communications field, and can help find the perfect match for your next project.

2. Talent

Our associates are truly second to none in their depth of industry experience and in the quality of work they produce. At Steyer, we only employ self-starters who make a real contribution to your project from the get-go.

3. Experience

With over 40 years of combined recruiting and technical communications experience, the Steyer management team adds unparalleled value to your business.

4. Service

We've founded our business on providing excellent customer service and attention to detail. We treat our clients and associates with respect and integrity, and strive to exceed their expectations.

- *RealNetworks*

Our specialties

Technical Writing

Our highly qualified technical writers can develop content for end-user, IT professional, and developer audiences. Positions filled include:

- **Programmer writer:** Our programmer writers typically are developers themselves. Coming from development teams, they translate information into clear, concise, and thorough documentation for developer audiences.
- **Technical writer:** Our technical writers develop content for end-user and IT professional audiences, including end-user guides, deployment and installation guides, online help, white papers, policies and procedures, and user interface text.

Technical Editing

Steyer editors work with your documentation to ensure the highest level of clarity, accuracy, and consistency. Positions filled include:

- **Programmer editor:** Our programmer editors work closely with programmer writers to ensure that developer documentation is thorough, to the point, and accessible.
- **Technical editor:** Our technical editors ensure that the documentation is accurate, follows appropriate style guidelines, and is well organized.

Program and Project Management

Our skilled associates will keep your project on deadline and on budget. Positions filled include:

- **Project manager:** Our project managers implement and oversee project planning, execution, control, and project evaluation.
- **Content program manager:** Our content program managers monitor resource needs to ensure that our writers and editors are working at full capacity on priority projects defined by the client team.

Instructional Design

Our instructional designers offer basic needs analysis, skills gap identification, curriculum development, and learning management services (LMS) integration. We create training materials for both technical and business audiences.

Business Process Writing

Our business process writers evaluate and document your new or existing business processes—everything from the smallest details to the big picture.

Our writers produce quality content in many areas, including:

- *Software development kits (SDKs)*
- *API documentation*
- *Deployment and installation guides*
- *User guides*
- *Online help*
- *White papers*
- *Policies and procedures*
- *User interface text*

Steyer values

- *Supply the very best people for a particular task and team*
- *Go the extra mile to provide excellent service to both our clients and associates*
- *Stand by our solutions*
